8.2.2.3.html

**Complete the activity and answer the questions below.**

**Refer to the activity.** What is true of the components or ports used on a router?

- ☒ AUX ports and SSH both allow remote access and management to the router.
- ☐ Console ports and SSH are two ways to physically connect to the router.
- ☐ The Gigabit Ethernet interfaces are used to perform the initial configuration of the router.
- ☐ Telnet requires telephone line to access the router.
